

Fencing Data Sheet

Palisade security fence

The Trifen **Palisade** family of fencing is designed to provide a formidable barrier. It is manufactured from hot formed and cold rolled substantial steel sections. These sections offer both strength and rigidity combined with a long life span.

Trifen **Palisade** is produced with two distinct alternative pale profiles, and is available with a wide range of paling head options.

Wall mounted palisade is also available, please specify at the time of order.

Available with a wide range of specifications to offer protection for differing levels of perceived risk, starting from low risk for demarcation purposes through to our enhanced specifications using a thicker pale profile. Our sales team are happy to discuss and assist with providing a precise specification to meet every customers expectations.

Safety must be the top consideration when specifying a security fence. The use of triple point **Palisade** at heights below 1.8m is not recommended, alternative fence styles should be used below this height.
